

PREDICT BIGGEST TOURIST SEASON FOR CANADA

OTTAWA—Returned to Ottawa from a recent tour of the States in New York, Dr. Leo Dineen, chief of the Canadian Travel Bureau, predicted the biggest and most tourist season this year in Canada's history.

Revenue from tourist traffic which in 1934 topped \$222,000,000 is expected this year to run between \$240,000,000 and \$260,000,000. Tourists in Eastern Ontario are going to be looked to especially, replied Mr. Dineen. "Only recently," he said, "I visited New York. I was president of the Eastern Ontario Tourist Association, now on a six-weeks sabbatical tour of the States. I never before had been so many Americans planning their vacations for this section of the country."

Imports from American tourists to the Travel Bureau have been rising 1.50 per cent during February, 28,000 having been returned in January.

The Bureau has been making difficulty in securing additional accommodation to handle the deluge of tourists.

The inflation of this season's increase of tourist traffic over last year was a record of 20,000,000 in January, against some 2,000 in the same month of 1934.

There was only one dull spot in the otherwise gleaming picture, and that was lack of consumer goods.

High prices of American goods with plenty of money to spend would begin rolling over the border country, in search of leisure, recreation and all the other things of which manufacturers, who can supply even for domestic consumers.

Human Heart Does Wonderful Work

In Spite of Squalor
Daily Task, to Exhaust

The following article appeared in the Leader Magazine, London, Eng., a few young people, who, in their body pass twice through the heart within one to two minutes. All the blood pumped by the heart carries the growing people's heart contents and extends eighty times.

When a man or woman dies, his heart stops for the first time after having pumped 100,000 times.

Your heart works only eight to ten times in spite of the smallness. It has to perform a daily task equal to that of a life which carries the growing people's heart contents and extends eighty times.

When a man or woman dies, his heart stops for the first time after having pumped 100,000 times.

Your heart works only eight to ten times in spite of the smallness. It has to perform a daily task equal to that of a life which carries the growing people's heart contents and extends eighty times.

HOME AFTER SOUTH AMERICAN TREK—First white woman to reach the headwaters of the Amazon River, Françoise Brault, who travelled the 2,500 miles up the river with a missionary party, is back in Montreal, P.Q., with her pet, a three-year-old bulldog named, which she is a really hot on show trip home.

Russia To Train Experts In Five-Year Science Plan

WASHINGTON—Russia's five-year plan for scientific research, the training of 1,280,000 technicians and 100,000 laboratory specialists with scientific degrees.

Details of the tremendous effort Russia is making to recover from wartime losses of research institutions and to come abreast of other countries in the field of science are disclosed in official Soviet publications and other papers dealing with the reconstruction of a post-war Russia.

A recent "Soviet information bulletin" reported that the Germans destroyed 60 research institutions, 100 scientific organizations and 100 laboratories. However, actual statistics are not available.

Research directly connected with military purposes, including atomic energy, is only one phase of the program. Research in other subjects is given high priority.

On the basis of available information, here are some of the phases of the integrated program to accelerate Russia's race in research in addition to the training of the scientists.

Establishment of a ministry for scientific research, including the training of the scientists.

Special incentives for Soviet scientists, including the granting of special awards for carrying out research in the field of science.

DROP IN CANADIAN SHEEP AND WOOL PRODUCTION BECOMING ALARMING

In reviewing today's sheep and wool situation it would seem that the drop in production in the last few years is becoming alarming.

In 1934, the wool production in the Dominion was 29 per cent, in 1935, 28 per cent, in 1936, 27 per cent, in 1937, 26 per cent, in 1938, 25 per cent, in 1939, 24 per cent, in 1940, 23 per cent, in 1941, 22 per cent, in 1942, 21 per cent, in 1943, 20 per cent, in 1944, 19 per cent, in 1945, 18 per cent, in 1946, 17 per cent, in 1947, 16 per cent, in 1948, 15 per cent, in 1949, 14 per cent, in 1950, 13 per cent, in 1951, 12 per cent, in 1952, 11 per cent, in 1953, 10 per cent, in 1954, 9 per cent, in 1955, 8 per cent, in 1956, 7 per cent, in 1957, 6 per cent, in 1958, 5 per cent, in 1959, 4 per cent, in 1960, 3 per cent, in 1961, 2 per cent, in 1962, 1 per cent, in 1963, 0 per cent, in 1964, 0 per cent, in 1965, 0 per cent, in 1966, 0 per cent, in 1967, 0 per cent, in 1968, 0 per cent,
